EDUCATION

Thapar Institute of Engineering and Technology
Bachelor of Technology in Computer Science and Engineering

Patiala, Punjab
Aug. 2023 – June 2027

EXPERIENCE

Samsung Prism Research Intern
Samsung Pvt Ltd, India

Jan. 2025 – Present
Remote

- Building an AI-powered worklet generation system leveraging LLMs and agentic frameworks based on previous worklets, leveraging LLMs and agentic frameworks.
- Designing and implementing a web interface for user input, Reducing worklet generation time to under 5 minutes, enhancing efficiency
- Conducting a literature survey and finalizing the architecture, Authoring a research paper on AI-driven worklet generation and a working prototype.

Backend & DevOps Intern
LMTSM,

Dec. 2024 – Feb. 2025
Patiala, Punjab

- Developed a platform for students to list their startups, improving visibility and networking opportunities.
- Implemented advanced features like fuzzy search and optimized database indexing for better performance.
- Gained hands-on experience in DevOps: set up servers, configured CI/CD pipelines, managed DNS records, worked with static IPs, and implemented load balancing using Nginx as a reverse proxy.
- Enhanced backend performance and deployment workflows, improving scalability, reliability, and fault tolerance

PROJECTS

Robotics Lab Thapar, website
Autonomous Robotics Lab, TIET

Sept. 2024 – Present
Patiala, Punjab

- * Designed and deployed a robust backend architecture for the Robotics Lab headed by Dr Sachin Kansal to optimize performance, scalability, and reliability.
- * Established and maintained CI/CD pipelines, automating deployments for efficient, fault-tolerant DevOps workflows.
- * Implemented secure admin functionalities, enabling efficient content and user management.
- * Collaborated with frontend team for seamless integration and improved user experience.

Resourcify - Enterprise System for the Indian Army | Django, PostgreSQL, Vue.js, Docker, AWS
(Patiala Cantonment)

2024

- * Engineered robust backend services for a custom ERP system tailored to the operational needs of a military cantonment, enhancing efficiency in manpower management, task allocation, and resource tracking.
- * Optimized data handling and integration processes to ensure seamless communication between various modules, supporting scalability and long-term system maintainability.
- * Partnered closely with a cross-functional team of four, aligning backend functionality with frontend requirements and user needs to achieve smooth system integration and high performance.

TECHNICAL SKILLS

Languages: Java, Python, C/C++, JavaScript, Typescript, Go
Frameworks: React.js, Django, FastAPI, Express.js, TensorFlow, PyTorch, LangChain
Tools: Docker, Kubernetes, Amazon Web Services, Digital Ocean
Databases: MySQL, PostgreSQL, MongoDB, Redis

ACHIEVEMENTS

- Winner of Smart India Hackathon (SIH 2024) India's Biggest Hackerthone
